HYGIENE STATION

The First Line of Defense Against Cross-Contamination

A simple hygiene step at the production entry can prevent a much bigger contamination problem.

CRONAX INDUSTRIES
Cleanroom & Hygiene Solutions

HOW DOES CONTAMINATION ENTER?

It often enters with people.

Hands touch contaminated surfaces.
Boots pick up dirt and residue.

Gloves contact non-sanitized areas.
Dust, fibers and microorganisms
travel into production.

The risk starts at the entry point.

WHY HYGIENE POLICIES ALONE AREN'T ENOUGH

Rules depend on people remembering to follow them.

A hygiene station turns a policy into a controlled process.

RISK SITUATIONS

Shift changes

Busy production hours

Staff movement

Visitor entry

WHAT HAPPENS AT A HYGIENE STATION?

01

CLEAN FOOTWEAR

removes dirt and
contaminants from footwear

02

CLEAN HANDS

sensor or foot-pedal
operated hand washing and
automatic hand sanitization

03

CHANGE FOOTWEAR

separates outside
and production areas

04

CONTROLLED ENTRY

interlocked doors can ensure
the process is completed

WHY IT MATTERS IN MANUFACTURING

The entry point sets the outcome.

Stop contamination before it reaches production.

FOOD INDUSTRY

Microbial contamination

Allergen cross-contact

PHARMACEUTICALS

Microbial contamination

Particulate contamination

ELECTRONICS

Dust, fibers and particles

Affect product quality

COMMON HYGIENE STATION MISTAKES

- ❌ Manual taps that require hand contact
- ❌ No physical separation between zones
- ❌ Station too small for shift-change traffic
- ❌ Empty sanitizer or poorly maintained equipment
- ❌ No regular cleaning & service schedule
- ❌ Using the same setup even after workforce expansion

Good hygiene control needs
the right design + regular maintenance.

WHAT SHOULD YOU CHECK BEFORE BUYING?

- ✔ Does the layout control the complete hygiene sequence?
- ✔ Are important fixtures non-contact?
- ✔ Can it handle peak shift-change traffic?
- ✔ Is it easy to clean and maintain?
- ✔ Can the materials handle your cleaning chemicals?
- ✔ Can the station be customized for your facility?

WHY CHOOSE CRONAX INDUSTRIES?

Built around your production needs — not a one-size-fits-all design.

- Custom hygiene station layouts
- Stainless steel construction
- Sensor- and foot-pedal-operated fixtures
- Designed for controlled entry
- Suitable for high-traffic production areas
- Installation & service support across India

Cronax Industries helps create a cleaner, more controlled entry into your production area.

CONTROL CONTAMINATION BEFORE IT ENTERS

CRONAX

A well-designed Hygiene Station
can make personnel hygiene more
consistent, controlled and practical.
